EXPERIENCE

Software Developer Intern

Go Digital, Addis Ababa, Ethiopia

2024 (4 months)

- Built internal software during a 4-month junior dev internship.
- Developed a secure document management system in React.
- Implemented encrypted data storage with senior engineers.

Network Security Administrator (Intern)

Deneba Technical & Vocational School

2025 (4 months)

- Handled network installation and configuration (Cisco).
- Gained hands-on infrastructure and security experience.

Hospital Management System (Project)

JavaScript, HTML, PHP, Google Maps API

2024

- Built a hospital management system to handle patient records, appointments, doctor information, and hospital services.
- Integrated location-based features so users find hospital branches, improving accessibility and navigation.
- Designed the database and system structure for efficient record handling.

Financial Transaction Management System (Project)

HTML, JavaScript, CSS

2024

- Built a financial system handling money transfers, balance tracking, and transaction records.
- Implemented core banking concepts: account management, transaction history, and secure data handling.
- Designed a clean, user-friendly interface for organized financial data.
